

Solid Dose Product Feeding Solutions

Brush Box & Vibratory Feeders

Using state-of-the-art design tools, HPT Pharma design engineers assess your feeding requirements and offer suitable options.

Utilize 3D printing technology to prototype feeder designs

Match feeder formats to your existing equipment

Optimized designs to increase throughput

Test feeders on HPT feeder test stand

Provide documentation package with each shipment to simplify validation

HPT Pharma provides turnkey solid dose product feeding solutions. Advanced solid modeling design tools, modern equipment and our dedicated team — including a full-service engineering staff, technicians and machinists — bring industry experience and proven techniques to meet the most challenging feeding requirements.

HPT Pharma offers the following feeding equipment solutions:

- Manual Feed Trays
- Bulk Product Feeders
- Brush Box (Universal)
- Dedicated Feeder Cassettes
- Multi-fill Applications

Dedicated Feeder Format Cassettes

HPT Pharma provides dedicated product feeders that operate accurately and efficiently in high volume packaging applications.

- In-house validation and testing on HPT feeder test stand
- Video footage of testing provided with validation documentation package
- Documentation package includes assembly documentation, materials of construction, coatings and acceptance test video.
- Shortest industry lead-times
- FDA approved materials and coatings
- Large inventory of replacement tubes and wear parts

Feeder Format Cassettes

- Aylward
- SimTap
- Sypro
